Field Day

**Upper Monkerai, Dungog
Sunday 29 May 2022
09:30 for 10:00**

Forest Management

Walk through a forest while talking through the possible options for management of the forest including:

- Fire prevention strategies and fire management
- Erosion - causes and control
- Ecological thinning of the regrowth forest
- Weed invasion and control
- Protection of older trees
- Permaculture planning and principles

The property is 60 hectares dominated by a ridge line with a western facing slope. The dominant trees species on the slopes and ridges are Spotted Gum, White Mahogany, Grey Gum, Sydney Blue Gum, and Tallowood with the occasional Brushbox. Most of the property is regrowth but there are small stands of larger, older trees.
